

Scripting Sample

This form allows you to enter a script and execute it using either the **Run FormCalc** or **Run JavaScript** button. By default the result will appear in the Result field, but your script can also access or manipulate the other fields, List Box, Drop-down list, Radio Buttons, or Check Box on this form.

To save a script which you have entered, you should save it with another file name. You can clear all of the results by clicking the **Clear Fields** button.

1 Enter your script here

2 Result

3 Objects to use

Text Field: Name = 'TF1'

Numeric Field: Name = 'NF1'
